
Norman is a real person and is our expert head of Quality Assurance. Norman appears here to bring to your attention features, technical or quality issues.

More importantly the reasons why, on occasions, it's worth paying a little more for a product that may look similar to a cheaper alternative but is much better.

All Elora products are hot dropped forged under strict production control resulting in top quality tools. This means that in the Elora factory, wrenches, ratchets, socket parts and many other products are forged under Elora's control to its own exacting high standards. The major proportion of the Elora range is made from one-piece forgings. Hardening takes place in a continuous automatic hardening furnace followed by tempering in oil. This strictly controlled process gives clean and precisely hardened products and ensures that these products are amongst the best in the world and particularly suitable for professional and industrial use.
