The story of WOLF-Garten	42

Getting started in the garden

Whether you are starting a new garden from a fresh plot or are developing an existing garden you have acquired, it will always involve a certain amount of care. To help you be as efficient as possible in the garden you will require the right gardening tool for the right job. Many of these core tools will be in constant use so choosing good quality, reliable equipment that is lightweight and comfortable in use is important.

New for 2021 Our innovations for a successful gardening year

WOLF-Garten has further improved the innovative and unique multi-change® system for 2021.

The multi-change® Mini range will now be presented in a high-quality design with a new grey collar. The new ZMo15 handle has an ergonomic design and function, whilst the multi-change® sweeping tools are also presented in a new look with improved functionality.*

*Please note – all product updates mentioned have a rolling change throughout 2021.

New brooms for efficient sweeping

WOLF-Garten has developed the X-tra clean series of brooms to help clean floors faster and more thoroughly. This is made possible by an X-shaped overlapping arrangement of the bristles made from durable materials, each tailored for specific sweeping tasks. The result is quick and efficient sweeping in both wet and dry conditions. In addition, the round shape of the brush body allows you to easily reach corners and narrow spaces without damaging the edges of your furniture.

New design meets uncompromising ergonomics

The specially shaped ZMo15 handle fits perfectly in the hand and enables comfortable, effortless handling. The safety zones at the front and end of the handle, combined with the non-slip mid-section ensure safe and controlled work.

Function and safety

- multi-change® connection and locking mechanism
- Non-slip surface is comfortable to hold and ensures a secure grip

Comfort and ergonomics

- Ergonomically shaped handle designed to fit comfortably in the hand allowing effortless operation
- Angled end supports push and pull actions
- Large palm rest at the end of the handle allows force to be applied without leaving pressure marks

An introduction to multi-change® Gardening without the backache!

Our multi-change® range is specifically designed to be lightweight and comfortable to use.

The 'every tool head fits every handle' multi-change® range comprises of a selection of 12 handles of different lengths (to suit your height or the task at hand) and over 50 tool heads to cater for any type of gardening and household task.

When you find a handle that you love, you can choose from our comprehensive selection of tool heads and just 'click' them together to get any gardening job done with a straight back. When you have your handle, you can keep adding to your collection of tool heads as it only takes a quick press of a button to release one tool head and swap it for another.

3

A system to suit all seasons

The multi-change® system will help you achieve your gardening goals whether it's spring, summer, autumn or winter. Simply click off and on to adapt your tools for whatever job the season demands.

35 YEARS
GUARANTEE
MADE IN GERMANY

All products in the multi-change® range manufactured from 2018 onwards come with a 35 year guarantee against defective material or assembly under normal usage.

Designed to last for generations!

Our multi-change® devices are ergonomically designed with handles of different lengths to suit your body size for simplified, back-friendly work. There is also an option of extendable handles to enable safe working without the need for a ladder.

The extraordinary craftsmanship and use of high quality materials are supported by our 35 year guarantee on every multi-change® device from 2018 onwards. This allows you to pass on your skills to the next generation of young gardeners, who can use our tools for years to come.

multi-change® Handles

A handle is the starting point for any multi-change® collection, whether it's for general use or for a more specific application.

All of our lightweight metal handles are made using recycled aluminium and each handle has a fixed seat, guaranteed to withstand vibration and absorb shock when in use.

ZMo2	Mini Handle

multi-change® Cultivation Tools

The multi-change® cultivation tool range incorporates all the tools needed to keep borders in good health, as well as the tools required for an allotment area.

Each tool has a solid, robust design with tines, prongs and blades that will resist bending, wear and corrosion.

BAM Grubber
Width 9cm

- For breaking up soil between plants in beds and borders
- Sharp pointed prongs for hard and stony ground

BEM Cultivator
Width 11cm

- Lance shaped prongs break up medium soils for good nutrient distribution
- Durable zinc chrome plate and lacquer finish

BIM Aerator
Width 3.5cm

- Loosens soil with ease in confined spaces, for optimum nutrient distribution
- Extra hardened with lacquer finish

ILM3 Double Hoe
Width 8cm

- Broad, sharp angled blade for weeding or drawing out seed drills
- Sharp prongs on rear break up heavy soil

DAS Soil Miller
Width 15cm

- Crumbles soil into a fine tilth for sowing seeds or planting
- Mixes peat, manure and fertiliser into the soil
- Rear blade keeps tool at a constant depth

35 YEARS
GUARANTEE
MADE IN GERMANY

JAM	Ridger
Width	20cm

- For producing up to 20cm wide furrows for planting potatoes etc
- For ridging up and earthing up around plants

EAM	Small Seed Sower
Width	20cm

- Saves time and effort by sowing seeds uniformly in rows without bending
- 6 adjustable seed size settings - up to pea size

DSM19	Close Toothed Rake
Width	19cm

- Rake with curved teeth which are easily pulled through soil and gravel
- Durable zinc chrome plate and lacquer finish

DRM30	Soil Rake
Width	30cm

- Universal garden rake with solid, high quality steel head and curved teeth for easy soil penetration

DOM40	Bow Rake
Width	40cm

- Curved teeth can be pulled through soil and gravel smoothly and easily
- Flat top for levelling seed beds

Gloves

The WOLF-Garten glove range has been specifically designed to cater for a variety of gardening tasks. They are robust, durable, machine washable and help to keep hands well protected. Our gloves are available in small, medium and large. See page 41 for more details.

multi-change® Lawn Care

The multi-change® lawn care range is a comprehensive range of premium quality garden tools for a beautiful lawn, year after year. To create the perfect lawn, it is essential to remove organic matter from the grass roots and to tidy up any straggly lateral growth every 6-8 weeks.

RMM Lawn Edge Iron
Width 22.5cm

- Cuts turf to create a neat edge
- Traditional half moon design
- Blade stays sharp in use

RBM Lawn Edge Trimmer
Width 15cm

- Cuts perfect edges of any shape or size whilst keeping your back straight
- Easy to manoeuvre
- Sharp serrated blades for clean cutting performance

UAM Springtine Rake
Width 50cm

- Unique curved fan shape, cleans and collects grass from large areas
- Specially designed tines which won't dig into the grass

UBM Lawn Rake
Width 50cm

- Unique curved fan shape, cleans and collects grass from large areas
- Specially designed tines which won't dig into the grass
- Polypropylene body

4-in-1 Rake 4-in-1 Leaf Rake
Width 20cm, 48cm and 76cm

- 3 working widths to choose from, 20cm, 48cm and 76cm
- Can be dismantled into 3 parts
- Removes leaves and green waste from small and large areas

UIMC Leaf Rake
Width 42cm

- For gathering leaves, grass clippings and debris from paved areas
- Ideal for use on hard ground

UHM Longspan Rake
Width 58cm

- Wide rake ideal for collecting large quantities of clippings
- Specially designed tines 'glide' over lawn and won't 'bite' in

UGM Moss Removal Rake
Width 30cm

- Clears moss and thatch from the lawn
- Head swings back and forth to help rake 'glide' over lawn when pushed and 'bite' into the lawn when pulled

URM3 Roller Moss Removal Rake
Width 30cm

- Clears moss and thatch from the lawn
- Head swings back and forth to help rake 'glide' over lawn when pushed and 'bite' into the lawn when pulled

Secateurs

WOLF-Garten offers a wide range of secateurs including bypass for new stems and anvil for tougher, woodier growth.

Bypass secateurs work on a scissor-like cutting action with one blade 'bypassing' the other. They are ideal for cutting growth which is younger (up to 2 years old) as they provide a very clean cut, essential for maintaining a healthy plant or shrub. Little pressure is required in pruning of this nature so the secateurs themselves are light in weight.

For older thicker stems, it is best to use an anvil secateur to reduce the strain on the wrist and hand. With anvil secateurs the blade closes against a softer metal on the lower jaw, this does not produce such a clean cut as a bypass secateur, which is why it is not suited to young stems but more to older wood where the cleanliness of the cut is not so important. Always consider the density of the wood you are cutting and ensure you have the right tool for the job; you may want to upgrade the cutting tool to avoid unnecessary strain on the hand.

RREN Bypass Secateurs
Cutting Diameter 19mm

- For delicate and precise pruning
- Suitable for both left and right handed use
- Coated blades for non-stick pruning and easy cleaning

RR1500 Bypass Secateurs
Cutting Diameter 18mm

- Multi-purpose secateurs
- Ideal for medium size hand
- Easy to use locking mechanism
- Internal spring mechanism

RR2500 Bypass Secateurs
Cutting Diameter 22mm

- Ideal for medium size hand
- Soft grip handle
- Blade PTFE with non-stick coating
- Internal spring mechanism
- Easy to use locking mechanism

RR4000 Bypass Secateurs
Cutting Diameter 22mm

- Ideal for large size hand
- Soft grip handle
- Comfortable robust bypass secateurs for regular use
- Internal spring mechanism

RR5000 Professional Bypass Aluminium Secateurs
Cutting Diameter 25mm

- Delicate and precise pruning
- Robust aluminium handle with smooth plastic insert
- Integrated spring
- Ergonomically designed blade to avoid over extension of hand
- Replaceable blades

RSEN Anvil Secateurs
Cutting Diameter 19mm

- For tough, woody and general pruning
- Suitable for both left and right handed use
- Coated blades for non-stick pruning and easy cleaning

- For tough, woody pruning
- Robust aluminium handle with smooth plastic insert
- Integrated spring
- Ergonomically designed blade to avoid over extension of hand
- Easy to replace anvil block

10 YEARS
GUARANTEE
MADE IN GERMANY

Loppers

A simple rule for choosing the right lopper is bypass for younger branches and anvil for hardier or dead wood. It is especially important to ensure you use the right tool for the job when cutting greener branches as the bypass lopper allows for a more accurate cut without crushing the branch.

Be sure that the lopper will be able to make one clean cut, otherwise you cause multiple wounds to the branch that can attract insects or disease more quickly. The longer the handles, the more leverage you will have when cutting, making it easier to achieve a clean cut. Telescopic loppers are available in the WOLF-Garten range to reach taller bushes.

RR630 POWER Cut Bypass Lopper
Cutting Diameter 35mm

- Simple leverage
- Ergonomic 1-K plastic handles
- Non-stick blades

RR650 POWER Cut Bypass Lopper
Cutting Diameter 40mm

- New cutting head technology
- Ergonomic 1-K plastic handles
- Non-stick blades
- 2 x cutting power

- For cutting out deep rooted weeds
- Comfort grip handle for extra support during the pulling movement

LD2K Small Sweep

Width 11.5cm

- For cleaning up foliage
- Ideal for smaller flower beds or balcony boxes
- Comfort grip handle for extra support during the pulling movement

LN2K Double Hoe

Width 7cm

- 2 in 1: hoeing and loosening soil
- Sharp blade for precision hoeing
- 3 sharp tines to loosen soil
- Comfort grip handle for extra support during the pulling movement

LU2K Wide Trowel

Width 7cm

- For planting and transplanting
- Comfort grip handle for extra support during the pulling movement

LU2P Planting Trowel

Width 5cm

- For planting and transplanting
- Similar to LU2K but narrow surface area for precise planting
- Comfort grip handle for extra support during the pulling movement

10 YEARS
GUARANTEE
MADE IN GERMANY

Spades

Helping you cope with extreme loads

Digging the soil in your garden can be quite exhausting, so finding the right spade for the job is essential. The strength and stability of our two spades help you deal with extreme loads and simplify even the most difficult of tasks.

Their induction-hardened boron steel blades easily penetrate the ground, whilst the stiffening ribs ensure the spades will not bend. An upright posture can be maintained thanks to the handle length and the tread edge, making ground work fast and effective.

ASD **Spade**
Length **123 cm**

- Ergonomic D-grip
- Hardened boron steel blade for maximum stability and durability
- Reinforced steel handle with non-slip surface for comfortable handling

ENHANCED DURABILITY
 Inductive hardened boron steel effect head with stiffening ribs

ERGONOMIC SHAPE
 Reinforced steel shaft equipped with a non-slip sleeve for secure grip and comfort

ASPD **Pointed Spade**
Length **123 cm**

- Ergonomic D-grip
- Hardened boron steel blade for maximum stability and durability
- Reinforced steel handle with non-slip surface for comfortable handling
- Used for digging harder, stony soil easily

SAFE GRIP
 The ergonomic design and shape of the grip allows safe and comfortable operation

BACK-FRIENDLY
 The length of the tool and the tread edge allow you to work in a comfortable, upright position

UGM Moss Removal Rake
Width 30cm

- Clears moss and thatch from the lawn
- Head swings back and forth to help rake 'glide' over lawn when pushed and 'bite' into the lawn when pulled

4 008423 878028 >

URM3 Roller Moss Removal Rake
Width 30cm

- Clears moss and thatch from the lawn
- Head swings back and forth to help rake 'glide' over lawn when pushed and 'bite' into the lawn when pulled

GHBO7 Small Washable Soil Care Gloves

- Designed for soil cultivation tasks
- Integrated pores allow the skin to breathe
- Elasticated wrist cuff
- Small

GHBO8 Medium Washable Soil Care Gloves

- Designed for soil cultivation tasks
- Integrated pores allow the skin to breathe
- Elasticated wrist cuff
- Medium

GHBO10 Large Washable Soil Care Gloves

- Designed for soil cultivation tasks
- Integrated pores allow the skin to breathe
- Elasticated wrist cuff
- Large

UMM Tool Rack

- Space saving storage of home and garden equipment
- 80cm in width
- Includes 4 holders: 2 device holders, 2 multi-purpose hooks
- Variable hook positions

Bound by tradition – the story of WOLF-Garten

It all began with minor inventions that put the WOLF company on the map. One of the first achievements was the draw hoe, a tool designed to make agricultural work easier. Gregor Wolf developed it in 1927 in the ironware factory that his father August Wolf had founded together with his sons Gregor and Otto in 1922. The idea first came to him on his way home from work, while observing local farmers working their fields.

This initial innovation was followed by many others. In 1953 the WOLF Geräte GmbH was the first company in Europe to offer lawnmowers with rotating blades. In 1958 WOLF introduced the first electrical lawnmower to the European market prior to developing the world's most silent petrol lawnmower in 1975.

Over the years, the company has developed a clear and distinctive profile in the “green area”. The WOLF Geräte GmbH of the early era became WOLF-Garten, an established company known for their key skills regarding product quality, product diversity and gardening know-how with an expertise in environmental awareness. The focused research and development work in its own research institutes was just as important for their growth as the development of new market segments.

Later global innovations helped give the brand the distinctive wolf face on a red background. WOLF-Garten is highly successful with its innovative multi-change® system that has guaranteed top quality for more than 35 years and confidently provides a warranty for all associated products. The development of innovative seed and fertiliser products, as well as the extension of its lawnmower range have demonstrated the strength and diversity of the company. WOLF-Garten was one of the first companies to offer a wide range of versatile lawn tractors to the European market. Handheld all-season tools and special devices for winter use round off the WOLF-Garten range.

Numerous quality awards and excellent results in comparative testings document why the trust of novice as well as professional gardeners throughout Europe is justified by the quality and innovative strength of WOLF-Garten.

Making garden work easier, more enjoyable and more environmentally compatible will guide our corporate future. This goal is fully supported by our employees. It is them who ensure the familiar reliability, the high quality standard of the company and the inexhaustible innovative drive of WOLF-Garten.

To assure you of the quality of our tools, all products in the multi-change® range manufactured from 2018 onwards come with a 35 year guarantee for manufacturer's fault (not wear and tear). The remainder of our garden tools carry a 10 year guarantee, whilst our electric range comes with a 3 year guarantee.
