

Norman is a real person and is our expert head of Quality Assurance. Norman appears here to bring to your attention features, technical or quality issues.

More importantly the reasons why, on occasions, it's worth paying a little more for a product that may look similar to a cheaper alternative but is much better.

norman says

HACKSAW BLADES

Choosing hacksaw blades:
Always use the blades that have as many teeth as possible in contact with material e.g.
angle iron = 32TPI,
square section = 18TPI

Blade teeth should always point forward, or as shown by the chevrons on the blades.
Our Bi-metal blades combine the longevity of HSS and the flexibility of carbon steel.

HACKSAW BLADE TEETH SHOULD ALWAYS POINT FORWARD - LOOK FOR THE DIRECTION OF THE CHEVRONS ON OUR BLADES
