

Norman is a real person and is our expert head of Quality Assurance. Norman appears here to bring to your attention features, technical or quality issues.

More importantly the reasons why, on occasions, it's worth paying a little more for a product that may look similar to a cheaper alternative but is much better.

## norman says

ENGINEERS COLD CHISELS
Unlike builders cold chisels,
which are designed to be
used on brick and stone,
these engineers chisels and
punches are made of chrome
vanadium steel for prolonged
use on metal. The head is separately
hardened to avoid excessive
'mushrooming', although this is a necessary feature
to avoid chipping.

CHEEDSHOUSE ON MISSISSING
