

Norman is a real person and is our expert head of Quality Assurance. Norman appears here to bring to your attention features, technical or quality issues.

More importantly the reasons why, on occasions, it's worth paying a little more for a product that may look similar to a cheaper alternative but is much better.

#### IMPORTANT

Our range of padlocks are rated from 1-10 for their level of security. Those at the lower end of the scale should only be used as a deterrent and where the item or site is supervised i.e. sheds, toolboxes and domestic applications. At the top end of the scale are locks for premises that have long periods of non-supervision or where insurance companies set strict requirements.

**NOTE: DRAPER TOOLS WILL NOT ACCEPT ANY LIABILITY FOR LOSS OR DAMAGE ARISING FROM INCIDENTS THESE PADLOCKS ARE DESIGNED TO PREVENT**

#### 'KEYED ALIKE' PADLOCK SETS

These are ideal for places where one padlock type can be used for multi-locations within one place. This means that only one key is required.
