

STORMFORCE

INSTRUCTIONS FOR 230V Electric Stapler/Nailer

Stock No.83659 Part No.STNEKHDSF

IMPORTANT: PLEASE READ THESE INSTRUCTIONS CAREFULLY TO ENSURE THE SAFE AND EFFECTIVE USE OF THIS PRODUCT.

GENERAL INFORMATION

These instructions accompanying the product are the original instructions. This document is part of the product, keep it for the life of the product passing it on to any subsequent holder of the product. Read all these instructions before assembling, operating or maintaining this product.

This manual has been compiled by Draper Tools describing the purpose for which the product has been designed, and contains all the necessary information to ensure its correct and safe use. By following all the general safety instructions contained in this manual, it will ensure both product and operator safety, together with longer life of the product itself. All photographs and drawings in this manual are supplied by Draper Tools to help illustrate the operation of the product. Whilst every effort has been made to ensure the accuracy of information contained in this manual, the Draper Tools policy of continuous improvement determines the right to make modifications without prior warning.

3. GUARANTEE

3.1 GUARANTEE

Draper tools have been carefully tested and inspected before shipment and are guaranteed to be free from defective materials and workmanship.

Should the tool develop a fault, please return the complete tool to your nearest distributor or contact Draper Tools Limited, Chandler's Ford, Eastleigh, Hampshire, SO53 1YF. England. Telephone Sales Desk: (023) 8049 4333 or Product Help Line (023) 8049 4344.

A proof of purchase must be provided with the tool.

If upon inspection it is found that the fault occurring is due to defective materials or workmanship, repairs will be carried out free of charge. This guarantee period covering parts/labour is 12 months from the date of purchase except where tools are hired out when the guarantee period is 90 days from the date of purchase. The guarantee is extended to 24 months for parts only. This guarantee does not apply to normal wear and tear, nor does it cover any damage caused by misuse, careless or unsafe handling, alterations, accidents, or repairs attempted or made by any personnel other than the authorised Draper warranty repair agent.

Note: If the tool is found not to be within the terms of warranty, repairs and carriage charges will be quoted and made accordingly.

This guarantee applies in lieu of any other guarantee expressed or implied and variations of its terms are not authorised.

Your Draper guarantee is not effective unless you can produce upon request a dated receipt or invoice to verify your proof of purchase within the guarantee period.

Please note that this guarantee is an additional benefit and does not affect your statutory rights.

Draper Tools Limited.

4. INTRODUCTION

4.1 SCOPE

Ideal for upholstery and furnishing applications and also suitable for repairing fence panels or installing hardboard, etc. It is designed for domestic and light commercial use only. Any other application is considered misuse.

4.2 SPECIFICATION

Stock no.	83659
Part no.	STNEKHDSF
Voltage	230V~50Hz
Maximum operations per minute	20min ⁻¹
Fastener capacities:	
Staples (maximum No.100pcs)	15 – 25mm
Nails (maximum No.100pcs)	15 – 32mm
Sound pressure level	88.1±3dB(A)
Sound power level	92.1±3dB(A)
Vibration level.....	3.583±1.5m/s ²
Weight (machine only)	1.76kg

4.3 HANDLING & STORAGE

Although this machine is small in size, care must still be taken when handling and lifting. Dropping this machine will have an effect on the accuracy and may also result in personal injury. This machine is not a toy and must be respected.

The environment will have a negative result on its operation if you are not careful. If the air is damp, components will rust. If the machine is unprotected from dust and debris; components will become clogged: And if not cleaned and maintained correctly or regularly the machine will not perform at its best.

5. HEALTH & SAFETY INFORMATION

5.1 GENERAL POWER TOOL SAFETY WARNINGS

WARNING: Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

The term “power tool” in the warnings refers to your mains operated (corded) power tool or battery-operated (cordless) power tool.

1) Work area safety

- a) **Keep work area clean and well lit.** Cluttered or dark areas invite accidents.
- b) **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.
- c) **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

2) Electrical safety

- a) **Power tool plugs must match the outlet.** Never modify the plug in any way. **Do not use any adapter plugs with earthed (grounded) power tools.** Unmodified plugs and matching outlets will reduce risk of electric shock.
- b) **Avoid body contact with earthed or grounded surfaces such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.
- c) **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.
- d) **Do not abuse the cord.** Never use the cord for carrying, pulling or unplugging the power tool. **Keep cord away from heat, oil, sharp edges or moving parts.** Damaged or entangled cords increase the risk of electric shock.
- e) **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.
- f) **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

3) Personal safety

- a) **Stay alert, watch what you are doing and use common sense when operating a power tool.** **Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.** A moment of inattention while operating power tools may result in serious personal injury.
- b) **Use personal protective equipment. Always wear eye protection.** Protective equipment such as dust mask, nonskid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
- c) **Prevent unintentional starting.** Ensure the switch is in the off position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
- d) **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in personal injury.

- e) **Do not overreach.** Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.
- f) **Dress properly.** **Do not wear loose clothing or jewellery.** Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.
- g) **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of these devices can reduce dust-related hazards.

4) Power tool use and care

- a) **Do not force the power tool.** Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.
- b) **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- c) **Disconnect the plug from the power source and/or battery pack from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.
- d) **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.
- e) **Maintain power tools.** Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.
- f) **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- g) **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

5) Service

- a) **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.

5. HEALTH & SAFETY INFORMATION

5.2 CONNECTION TO THE POWER SUPPLY

Make sure the power supply information on the machine's rating plate are compatible with the power supply you intend to connect it to.

This product comes supplied with a UK standard 3 pin plug fitted. It is designed for connection to a domestic power supply rated at 230V AC.

This appliance is Class II† and is designed for connection to a power supply matching that detailed on the rating label and compatible with the plug fitted.

If an extension lead is required, use an approved and compatible lead rated for this appliance. Follow all the instruction supplied with the extension lead.

†Double insulated : This product requires no earth connection as supplementary insulation is applied to the basic insulation to protect against electric shock in the event of failure of the basic insulation.

Apart from replacing the fuse in the plug, no other electrical work is recommended on this stapler/nailer.

6. TECHNICAL DESCRIPTION

6.1 IDENTIFICATION

7. UNPACKING & CHECKING

7.1 PACKAGING

Carefully remove the product from the packaging and examine it for any sign of damage that may have happened during shipping. Lay the contents out and check them against the parts shown below. If any part is damaged or missing; please contact the Draper Help Line (the telephone number appears on the Title page) and do not attempt to use the tool.

The packaging material should be retained at least during the guarantee period: in case the machine needs to be returned for repair.

Warning! Some of the packaging materials used may be harmful to children. Do not leave any of these materials in the reach of children.

If any of the packaging is to be thrown away, make sure they are disposed of correctly; according to local regulations.

7.2 WHAT'S IN THE BOX?

As well as the product; there are several parts not fitted or attached to it.

⑩ 25mm (Type 'F') brad nails × 100.

⑪ 19mm crown staples × 300.

⑫ Hex key.

8. SETTING THE STAPLER/NAILER

Note: Remove the plug from the socket before carrying out adjustment, servicing or maintenance.

8.1 LOADING STAPLES AND NAILS – FIGS. 1 – 4

At the rear of the magazine is the magazine locking lever (5).

- To release it, press the locking lever forward and the sprung loaded magazine will slide open.
- To close the magazine, press down on the locking lever whilst sliding the magazine to the closed position then release the lever to lock in place.

The magazine has capacity for 18 gauge staples at 15 – 25mm sizes. A maximum of 100 staples can be loaded into the magazine at one time.

- Load the line of staples into the chamber (7), placing them against the top edge of the chamber and sliding left so that the leading edge of the line of staples fit around the guide shoe.
- Push the magazine back and lock in place.

FIG.1

FIG.2

FIG.3

The magazine will accept 'T' nails (Type 'F') at 15 - 32mm sizes. A maximum of 100 nails can be loaded into the magazine at one time.

- Load the line of nails into the bottom edge of the chamber and sliding left.
- Do not load on both sides as this will cause the product to malfunction.
- Push the magazine back and lock in place.

FIG.4

9. BASIC STAPLER/NAILER OPERATIONS

9.1 ON/OFF SWITCH – FIG. 5

To help prevent accidental firing the appliance features an on/off rocker switch (3).

Position the rocker switch to off when not in use.

9.2 FIRING THE STAPLER/NAILER – FIG. 6

Warning: Always wear safety goggles.

- Push the appliance firmly down on to the surface to activate the safety mechanism (8).
- Pull trigger (1) to deploy a fastening.

9.3 CHANGING THE POWER LEVEL – FIG. 7

The power level (4) will need to change depending on the material and the size of staples being used.

Note: Try a staple/nail on a piece of spare material to adjust the power level before using on final material.

Example: Stapling thin fabric onto soft wood with small staples:

- Turn power down to stop the staples being pushed completely through the fabric deep into the wood.

10. MAINTENANCE

10.1 MAINTENANCE

Regular inspection and cleaning reduces the necessity for maintenance operations and will keep your tools in good working condition.

If the replacement of the supply cord is necessary, this has to be done by the manufacturer or his agent in order to avoid a safety hazard.

10.2 UNBLOCKING JAMMED FASTENERS – FIGS. 8 – 11

Although this stapler/nailer is fitted with an anti-jam mechanism, should a fastening jam occur, follow the instructions given below.

Warning: Remove the plug from the socket before carrying out adjustment, servicing or maintenance.

- Slide the magazine out, opening the chamber to gain access to the blockage.
- A small pair of nose pliers may be required to free the blockage from either the loading mechanism inside the magazine or through the aperture of the firing head.
- Reload the magazine and retry.

Should the jam prove too difficult to remove with pliers alone, the plastic housing of the firing head can also be removed to gain access to the jammed mechanism.

- Remove the 2 hex bolts (12.1) from the front of the housing (9.1) using the hex key supplied (12).
- Remove the blockage using appropriate nose pliers and re-assemble the front housing (opposite procedure to above).
- Test that mechanism is free from any obstruction by testing the nailer on a piece of scrap wood, before re-inserting the nails or staples.
- Repeat the test with nails/staples loaded.

Warning: Never look into the mechanism whilst the unit is plugged in. Good practise would be to isolate the stapler/nailer whenever loading/changing the staples/nails.
