

# SAFETY DATA SHEET

## Denso Tape

This SDS is not mandated under REACH Regulation (EC) No 1907/2006 and is provided for information only.

SECTION 1: Identification of the substance/mixture and of the company/undertaking	
1.1. Product identifier	
Product name	Denso Tape
1.2. Relevant identified uses of	of the substance or mixture and uses advised against
Identified uses	Corrosion protection
Uses advised against	No specific uses advised against are identified.
1.3. Details of the supplier of t	the safety data sheet
Supplier	Winn & Coales (Denso) Ltd Denso House Chapel Road West Norwood SE27 0TR +44 (0)208 670 7511 mail@denso.net
1.4. Emergency telephone number	
Emergency telephone	+44 (0)208 670 7511 (M-F, 8-5 GMT)
SECTION 2: Hazards identific	ation
2.1. Classification of the subst	tance or mixture
Classification (EC 1272/2008)	Not Classified
Physical hazards	
Health hazards	Not Classified
Environmental hazards	Not Classified
2.2. Label elements Hazard statements	NC Not Classified
2.3. Other hazards	
This product does not contain any substances classified as PBT or vPvB.	
SECTION 3: Composition/information on ingredients	
3.2. Mixtures	
Composition comments	None of the ingredients are required to be listed.
SECTION 4: First aid measures	
4.1. Description of first aid me	asures
General information	Get medical advice/attention if you feel unwell. Show this Safety Data Sheet to the medical personnel.

Inhalation	Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.
Ingestion	Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Place unconscious person on their side in the recovery position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.
Skin contact	Wash skin thoroughly with soap and water. Do not use organic solvents.
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.
Protection of first aiders	No specific requirements are anticipated under normal conditions of use. First aid personnel should wear appropriate protective equipment during any rescue.
4.2. Most important symptoms	and effects, both acute and delayed
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	No specific symptoms known.
Ingestion	No specific symptoms known.
Skin contact	Prolonged contact may cause dryness of the skin.
Eye contact	No specific symptoms known. May be slightly irritating to eyes.
4.3. Indication of any immediat	e medical attention and special treatment needed
Notes for the doctor	Treat symptomatically.
SECTION 5: Firefighting meas	ures
5.1. Extinguishing media	
Suitable extinguishing media	Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire- extinguishing media suitable for the surrounding fire.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising fro	om the substance or mixture
Specific hazards	None known.
Hazardous combustion products	Hydrocarbons. Carbon monoxide (CO). Carbon dioxide (CO2).
5.3. Advice for firefighters	
Protective actions during firefighting	Avoid breathing fire gases or vapours. Evacuate area.
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.

### SECTION 6: Accidental release measures

## 6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material.

### 6.2. Environmental precautions

Environmental precautions Insoluble in water. Aquatic toxicity is unlikely to occur. Collect spillage.

## 6.3. Methods and material for containment and cleaning up

Methods for cleaning upWear protective clothing as described in Section 8 of this safety data sheet. Clear up spills<br/>immediately and dispose of waste safely. Collect and place in suitable waste disposal<br/>containers and seal securely. Flush contaminated area with plenty of water. Wash thoroughly<br/>after dealing with a spillage. For waste disposal, see Section 13.

## 6.4. Reference to other sections

**Reference to other sections** For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.

### SECTION 7: Handling and storage

7.1. Precautions for safe hand	ling	
Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Keep container tightly sealed when not in use. Do not handle until all safety precautions have been read and understood.	
Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.	
7.2. Conditions for safe storage	e, including any incompatibilities	
Storage precautions	Store away from incompatible materials (see Section 10). Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. The storage area floor should be leak-tight, jointless and not absorbent.	
Storage class	Unspecified storage.	
7.3. Specific end use(s)		
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.	
SECTION 8: Exposure Controls/personal protection		
8.1. Control parameters Occupational exposure limits		

Kaolin

Long-term exposure limit (8-hour TWA): WEL 2 mg/m<sup>3</sup> respirable dust Long-term exposure limit (8-hour TWA): WEL 2 mg/m<sup>3</sup> respirable dust Long-term exposure limit (8-hour TWA): WEL 2 mg/m<sup>3</sup> respirable dust Long-term exposure limit (8-hour TWA): WEL 2 mg/m<sup>3</sup> respirable dust

### Aluminium oxide

Long-term exposure limit (8-hour TWA): WEL 4 mg/m<sup>3</sup> respirable dust Long-term exposure limit (8-hour TWA): WEL 10 mg/m<sup>3</sup> inhalable dust WEL = Workplace Exposure Limit

#### Ingredient comments

No dust formed during normal use.

## 8.2. Exposure controls

## Protective equipment

Appropriate engineering controls	Provide adequate ventilation. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with European Standard EN374. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.
Other skin and body protection	Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.
Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke.
Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN140.
Environmental exposure controls	Keep container tightly sealed when not in use.

**SECTION 9: Physical and Chemical Properties** 

### 9.1. Information on basic physical and chemical properties

Appearance	Liquid-impregnated cloth.
Colour	Dark. Greenish. Brown.

Odour	Characteristic.
Odour threshold	Not available.
рН	Not relevant.
Melting point	Not available.
Initial boiling point and range	Not relevant.
Flash point	Not relevant.
Evaporation rate	Not relevant.
Flammability (solid, gas)	Not available.
Vapour pressure	Not relevant.
Vapour density	Not relevant.
Relative density	Not available.
Solubility(ies)	Insoluble in water.
Partition coefficient	Not available.
Auto-ignition temperature	Not relevant.
Decomposition Temperature	Not available.
Viscosity	Not available.
Explosive properties	Not considered to be explosive.
Oxidising properties	Does not meet the criteria for classification as oxidising.
9.2. Other information	
SECTION 10: Stability and rea	activity
10.1. Reactivity	
Reactivity	See the other subsections of this section for further details.
10.2. Chemical stability	
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.
10.3. Possibility of hazardous	reactions
Possibility of hazardous reactions	No potentially hazardous reactions known.
10.4. Conditions to avoid	
Conditions to avoid	There are no known conditions that are likely to result in a hazardous situation.
10.5. Incompatible materials	
Materials to avoid	No specific material or group of materials is likely to react with the product to produce a hazardous situation.
10.6. Hazardous decompositio	on products
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
SECTION 11: Toxicological in	formation

# 11.1. Information on toxicological effects

Acute toxicity - oral	
Notes (oral LD <sub>50</sub> )	Based on available data the classification criteria are not met.
Acute toxicity - dermal	
	Based on available data the classification criteria are not met.
Notes (dermal LD₅₀)	Based on available data the classification criteria are not met.
Acute toxicity - inhalation	
Notes (inhalation LC₅₀)	Based on available data the classification criteria are not met.
Skin corrosion/irritation	
Animal data	Based on available data the classification criteria are not met.
Serious eye damage/irritation	
Serious eye damage/irritation	Based on available data the classification criteria are not met.
Respiratory sensitisation	
Respiratory sensitisation	Based on available data the classification criteria are not met.
Skin sensitisation	
Skin sensitisation	Based on available data the classification criteria are not met.
Germ cell mutagenicity	
Genotoxicity - in vitro	Based on available data the classification criteria are not met.
Carcinogenicity	
Carcinogenicity	Based on available data the classification criteria are not met.
	No component of this work of an and the supervision of the supervision
IARC carcinogenicity	No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.
	probable, possible of commed human cardinogen by IAICO.
Reproductive toxicity	
Reproductive toxicity Reproductive toxicity - fertility	
Reproductive toxicity - fertility	Based on available data the classification criteria are not met.
Reproductive toxicity - fertility Reproductive toxicity -	
Reproductive toxicity - fertility Reproductive toxicity - development	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met.
Reproductive toxicity - fertility Reproductive toxicity - development Specific target organ toxicity -	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met. <u>single exposure</u>
Reproductive toxicity - fertility Reproductive toxicity - development	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met.
Reproductive toxicity - fertility Reproductive toxicity - development Specific target organ toxicity -	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met. <u>single exposure</u> Not classified as a specific target organ toxicant after a single exposure.
Reproductive toxicity - fertility Reproductive toxicity - development Specific target organ toxicity - STOT - single exposure	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met. <u>single exposure</u> Not classified as a specific target organ toxicant after a single exposure.
Reproductive toxicity - fertility Reproductive toxicity - development Specific target organ toxicity - STOT - single exposure Specific target organ toxicity - STOT - repeated exposure	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met. <u>single exposure</u> Not classified as a specific target organ toxicant after a single exposure. <u>repeated exposure</u>
Reproductive toxicity - fertility Reproductive toxicity - development Specific target organ toxicity - STOT - single exposure Specific target organ toxicity - STOT - repeated exposure Aspiration hazard	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met. <u>single exposure</u> Not classified as a specific target organ toxicant after a single exposure. <u>repeated exposure</u> Not classified as a specific target organ toxicant after repeated exposure.
Reproductive toxicity - fertility Reproductive toxicity - development Specific target organ toxicity - STOT - single exposure Specific target organ toxicity - STOT - repeated exposure	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met. <u>single exposure</u> Not classified as a specific target organ toxicant after a single exposure. <u>repeated exposure</u>
Reproductive toxicity - fertility Reproductive toxicity - development Specific target organ toxicity - STOT - single exposure Specific target organ toxicity - STOT - repeated exposure Aspiration hazard	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met. <u>single exposure</u> Not classified as a specific target organ toxicant after a single exposure. <u>repeated exposure</u> Not classified as a specific target organ toxicant after repeated exposure.
Reproductive toxicity - fertility Reproductive toxicity - development Specific target organ toxicity - STOT - single exposure Specific target organ toxicity - STOT - repeated exposure Aspiration hazard	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met. <u>single exposure</u> Not classified as a specific target organ toxicant after a single exposure. <u>repeated exposure</u> Not classified as a specific target organ toxicant after repeated exposure.
Reproductive toxicity - fertility Reproductive toxicity - development Specific target organ toxicity - STOT - single exposure Specific target organ toxicity - STOT - repeated exposure Aspiration hazard Aspiration hazard	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met. <u>single exposure</u> Not classified as a specific target organ toxicant after a single exposure. <u>repeated exposure</u> Not classified as a specific target organ toxicant after repeated exposure. Not relevant. Solid.

SECTION 12: Ecological Infor	mation
<u>_</u>	
Ecotoxicity	Not regarded as dangerous for the environment.
12.1. Toxicity	
Toxicity	Based on available data the classification criteria are not met.
12.2. Persistence and degrada	
Persistence and degradability	The degradability of the product is not known.
12.3. Bioaccumulative potentia	<u>al</u>
Bioaccumulative potential	No data available on bioaccumulation.
Partition coefficient	Not available.
12.4. Mobility in soil	
Mobility	The product is insoluble in water.
12.5. Results of PBT and vPvI	3 assessment
Results of PBT and vPvB assessment	This product does not contain any substances classified as PBT or vPvB.
12.6. Other adverse effects	
Other adverse effects	None known.
SECTION 13: Disposal consid	erations
13.1. Waste treatment method	
General information	The generation of waste should be minimised or avoided wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out.
Disposal methods	Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible.
SECTION 14: Transport inform	nation
General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).
14.1. UN number	
Not applicable.	
14.2. UN proper shipping name	
Not applicable.	
14.3. Transport hazard class(e	əs)

No transport warning sign required.

14.4. Packing group

Not applicable.

#### 14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant No.

14.6. Special precautions for user

Not applicable.

## 14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

## SECTION 15: Regulatory information

## 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

National regulations	Health and Safety at Work etc. Act 1974 (as amended). The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2009 (SI 2009 No. 1348) (as amended) ["CDG 2009"]. EH40/2005 Workplace exposure limits.
EU legislation	Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) (as amended).
	Commission Regulation (EU) No 2015/830 of 28 May 2015. Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures (as amended).

### 15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

## Inventories

#### EU - EINECS/ELINCS

None of the ingredients are listed or exempt.

### SECTION 16: Other information

Abbreviations and acronyms used in the safety data sheet	ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road.
-	ADN: European Agreement concerning the International Carriage of Dangerous Goods by
	Inland Waterways.
	RID: European Agreement concerning the International Carriage of Dangerous Goods by
	Rail.
	IATA: International Air Transport Association.
	ICAO: Technical Instructions for the Safe Transport of Dangerous Goods by Air.
	IMDG: International Maritime Dangerous Goods.
	CAS: Chemical Abstracts Service.
	ATE: Acute Toxicity Estimate.
	LC₅₀: Lethal Concentration to 50 % of a test population.
	LD₅₀: Lethal Dose to 50% of a test population (Median Lethal Dose).
	EC <sub>50</sub> : 50% of maximal Effective Concentration.
	PBT: Persistent, Bioaccumulative and Toxic substance.
	vPvB: Very Persistent and Very Bioaccumulative.

Training advice	Read and follow manufacturer's recommendations.
Revision date	27/06/2018
Revision	3
Supersedes date	01/09/2017
SDS number	4635

This information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is, to the best of the company's knowledge and belief, accurate and reliable as of the date indicated. However, no warranty, guarantee or representation is made to its accuracy, reliability or completeness. It is the user's responsibility to satisfy himself as to the suitability of such information for his own particular use.
