There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

#### <u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4: First aid measures**

| 4.1 Description of first aid measures |   |  |  |
|---------------------------------------|---|--|--|
| General                               | - | In all cases of doubt, or when symptoms persist, seek medical attention. Never give<br>anything by mouth to an unconscious person. If unconscious, place in recovery<br>position and seek medical advice.  |  |
| Eye contact                           | 1 | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.  |  |
| Inhalation                            | : | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.   |  |
| Skin contact                          | 1 | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.   |  |
| Ingestion                             | 1 | If swallowed, seek medical advice immediately and show the container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.  |  |
| Protection of first-aiders            | : | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |  |

## SECTION 4: First aid measures

## 4.2 Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

## 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.</li> <li>The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul> |
|---------------------|--|
| Specific treatments | : No specific treatment.   |

See toxicological information (Section 11)

#### SECTION 5: Firefighting measures 5.1 Extinguishing media Suitable extinguishing : Recommended: alcohol-resistant foam, CO2, powders, water spray. media Unsuitable extinguishing : Do not use water jet. media 5.2 Special hazards arising from the substance or mixture Hazards from the : Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard. substance or mixture **Hazardous combustion** : Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen. products 5.3 Advice for firefighters **Special protective actions** : Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses. for fire-fighters **Special protective** : Appropriate breathing apparatus may be required. equipment for fire-fighters

## SECTION 6: Accidental release measures

| Date of issue/Date of revision | : 4/30/2021  | Page: 4/14      |
|--------------------------------|--|-----------------|
| 6.2 Environmental precautions  | : Do not allow to enter drains or watercourses. If the product contan rivers, or sewers, inform the appropriate authorities in accordance regulations.                                     |                 |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take not information in Section 8 on suitable and unsuitable materials. See information in "For non-emergency personnel". |                 |
| For non-emergency<br>personnel | : Exclude sources of ignition and ventilate the area. Avoid breathing Refer to protective measures listed in sections 7 and 8.   | vapour or mist. |
| 6.1 Personal precautions, pro  | tective equipment and emergency procedures   |                 |

## **SECTION 6: Accidental release measures**

| 6.3 Methods and material<br>for containment and<br>cleaning up | : Contain and collect spillage with non-combustible, absorbent material e.g. sa earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Preferably clean with a deter Avoid using solvents. | , |
|--|---|---|
| 6.4 Reference to other sections                                | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.   |   |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

| handlingavoid vapour concentrations higher than the occupational exposure limits.<br>In addition, the product should only be used in areas from which all naked lights and<br>other sources of ignition have been excluded. Electrical equipment should be<br>protected to the appropriate standard.<br>Mixture may charge electrostatically: always use earthing leads when transferring<br>from one container to another.<br>Operators should wear antistatic footwear and clothing and floors should be used.<br>Keep away from heat, sparks and flame. No sparking tools should be used.<br>Avoid contact with skin and eyes. Avoid the inhalation of dust, particulates, spray or<br>mist arising from the application of this mixture. Avoid inhalation of dust from<br>sanding.<br>Eating, drinking and smoking should be prohibited in areas where this material is<br>handled, stored and processed.<br>Put on appropriate personal protective equipment (see Section 8).<br>Never use pressure to empty. Container is not a pressure vessel.<br>Always keep in containers made from the same material as the original one.<br>Comply with the health and safety at work laws.<br>Do not allow to enter drains or watercourses.<br>Information on fire and explosion protection<br>Vapours are heavier than air and may spread along floors. Vapours may form<br>explosive mixtures with air. |   |
|--|---|
| When operators, whether spraying or not, have to work inside the spray booth,<br>ventilation is unlikely to be sufficient to control particulates and solvent vapour in all<br>cases. In such circumstances they should wear a compressed air-fed respirator<br>during the spraying process and until such time as the particulates and solvent<br>vapour concentration has fallen below the exposure limits.  | I |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations.

Notes on joint storage

Keep away from: oxidising agents, strong alkalis, strong acids.

#### Additional information on storage conditions

Observe label precautions. Store in a dry, cool and well-ventilated area. Keep away from heat and direct sunlight. Keep away from sources of ignition. No smoking. Prevent unauthorised access. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

## 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient                       | name  | Exposure limit values  |
|--|---|--|
| Acetone                                  |   | EH40/2005 WELs (United Kingdom (UK), 12/2011).<br>STEL: 3620 mg/m <sup>3</sup> 15 minutes.<br>STEL: 1500 ppm 15 minutes.<br>TWA: 500 ppm 8 hours.<br>TWA: 1210 mg/m <sup>3</sup> 8 hours.  |

Ensure that eyewash stations and<br>are close to the workstation location.   |
| Eye/face protection                      | : Use safety eye  | wear designed to protect against splash of liquids.  |
|  |   |  |

## **SECTION 8: Exposure controls/personal protection**

| Skin protection                    |   |
|------------------------------------|---|
| Skin protection<br>Hand protection |   |
| Gloves                             | <ul> <li>For all types of exposure, a glove with protection class of 2 or higher (breakthrough time &gt;30 minutes according to EN374) is recommended. Recommended gloves: Nitrile, thickness ≥ 0.12 mm.</li> <li>Gloves should be replaced regularly and if there is any sign of damage to the glove material.</li> </ul>  |
|                                    | The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.  |
| Body protection                    | : Personnel should wear antistatic clothing made of natural fibres or of high-<br>temperature-resistant synthetic fibres.   |
| Other skin protection              | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection             | <ul> <li>If workers are exposed to concentrations above the exposure limit, they must use<br/>appropriate, certified respirators.</li> <li>OLD LEAD-BASED PAINTS:</li> </ul>  |
|                                    | When surfaces are to be prepared for painting, account should be taken of the age of the property and the possibility that lead-pigmented paint might be present. There is a possibility that ingestion or inhalation of scrapings or dust arising from the preparation work could cause health effects. As a working rule you should assume that this will be the case if the age of the property is pre 1960.   |
|                                    | Where possible wet sanding or chemical stripping methods should be used with<br>surfaces of this type to avoid the creation of dust. When dry sanding cannot be<br>avoided, and effective local exhaust ventilation is not available, it is recommended<br>that a dust respirator is worn, that is approved for use with lead dusts, and its type<br>selected on the basis of the COSHH assessment, taking into account the<br>Workplace Exposure Limit for lead in air. Furthermore, steps should be taken to<br>ensure containment of the dusts created, and that all practicable measures are<br>taken to clean up thoroughly all deposits of dusts in and around the affected area. |
|                                    | Respiratory protection in case of dust or spray mist formation. (particle filter EN143 type P2) Respiratory protection in case of vapour formation. (half mask with combination filter A2-P2 til concentrations of 0,5 Vol%.)   |
|                                    | The current Control of Lead at Work Regulations approved code of practice<br>should be consulted for advice on protective clothing and personal hygiene<br>precautions. Care should also be taken to exclude visitors, members of the<br>household and especially children from the affected area, during the actual work<br>and the subsequent clean up operations. All scrapings, dust, etc. should be<br>disposed of by the professional painting contractor as Hazardous Waste.   |
|                                    | Extra precautions will also need to be taken when burning off old lead-based<br>paints because fumes containing lead will be produced. It is recommended that a<br>respirator, approved for use with particulate fumes of lead is selected on the basis<br>of the COSHH assessment, taking into account the Workplace Exposure Limit for<br>lead in air. Similar precautions to those given above about sanding should be taken<br>with reference to protective clothing, disposal of scrapings and dusts, and<br>exclusion of other personnel and especially children from the building during<br>actual work and the subsequent clean up operations.                                  |
|                                    | Avoid the inhalation of dust. Wear suitable face mask if dry sanding. Special precautions should be taken during surface preparation of pre-1960s paint surfaces over wood and metal as they may contain harmful lead.  |
| Environmental exposure controls    | : Do not allow to enter drains or watercourses.   |

## **SECTION 9: Physical and chemical properties**

## 9.1. Information on basic physical and chemical properties

| Appearance                                      |   |   |

## **SECTION 10: Stability and reactivity**

÷

10.1 Reactivity

| 10.2 Chemical stability                    | : | Stable under recommended storage and handling conditions (see Section 7).  |
|--|---|--|
| 10.3 Possibility of<br>hazardous reactions | : |  |
| 10.4 Conditions to avoid                   | : | When exposed to high temperatures may produce hazardous decomposition products.  |
| 10.5 Incompatible materials                | : | Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids. |
| 10.6 Hazardous<br>decomposition products   | : | Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.        |

## **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

#### Acute toxicity

**Conclusion/Summary** : Not available.

## SECTION 12: Ecological information

#### 12.1 Toxicity

There are no data available on the mixture itself. Do not allow to enter drains or watercourses.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is not classified as hazardous to the environment.

| Product/ingredient name | Result                            | Species                                  | Exposure |

## 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

**12.6 Other adverse effects** : No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 13.1 Waste treatment methods

| Product                 |  |  |
|-------------------------|--|--|
| Methods of disposal     | The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. |  |
| Hazardous waste         | : The classification of the product may meet the criteria for a hazardous waste.   |  |
| Disposal considerations | : Do not allow to enter drains or watercourses.<br>Dispose of according to all federal, state and local applicable regulations.<br>If this product is mixed with other wastes, the original waste product code may no<br>longer apply and the appropriate code should be assigned.<br>For further information, contact your local waste authority.   |  |
| Packaging               |  |  |
| Methods of disposal     | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.   |  |
| Disposal considerations | Using information provided in this safety data sheet, advice should be obtained from<br>the relevant waste authority on the classification of empty containers.<br>Empty containers must be scrapped or reconditioned.<br>Dispose of containers contaminated by the product in accordance with local or<br>national legal provisions.  |  |
| Type of packaging       | European waste catalogue (EWC)   |  |
| CEPE Paint Guidelines   | 15 01 10* packaging containing residues of or contaminated by hazardous substances   |  |
| Special precautions     | : This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.   |  |

## **SECTION 14: Transport information**

Information pertaining to IATA and ADN is considered not relevant since the material is not packaged in the correct approved packaging required of these methods of transport.

|  | ADR             | IMDG            |

#### Notice to reader

IMPORTANT NOTE The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advice given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
