## BRICKWORK TOOLS

### CRAFTSMAN-MADE QUALITY FOR OVER TWO HUNDRED YEARS

By expertly bringing together advanced technology, the best design and a genuine commitment to total quality, **WHS TYZACK** offers a comprehensive range of superb pointing and brickwork trowels.

Each of our trowels, for example, is crafted from the finest carbon steel with a solid forged blade for supreme strength. Reflecting an increasingly popular trend, blades are now lighter and more flexible. Add further enhancements, including soft-feel handles that are the latest in ergonomic design, and you can see why **WHS TYZACK** is the first choice for ultimate comfort and performance.

## HANDLE OPTIONS

SHORT WOOD / LONG WOOD

Smooth wooden handle with integral tang firmly attached inside handle.

SHORT WOOD / LONG WOOD CAPPED

Plastic capped handle prevents splitting of wood when 'tamping' down bricks.

CELLULOSE ACETATE

Tough clear handle with a smooth finish and strong resistance to 'mushrooming'.

LEATHER

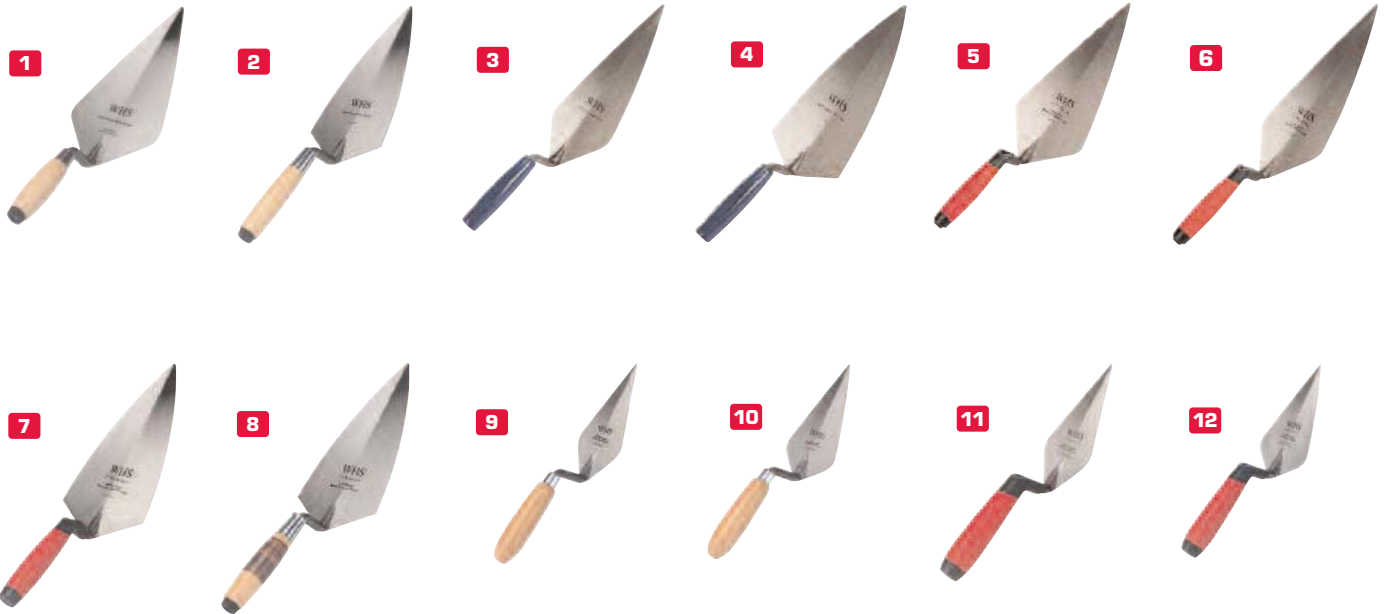

Wooden handle surrounded by leather ring inserts, to increase comfort and help absorb impacts.

SUREGRIP® SOFT-FEEL

Soft feel grip with ergonomic design for maximum comfort.

## HAMMERS

### Bricklayer's Hammer      Scutch Hammer      Club Hammer

Part No	Product Description	Weight	Handle	Pack Size	Part No	Product Description	Weight	Handle	Pack Size	Part No	Product Description	Weight	Handle	Pack Size
SJ-BSH25	Bricklayer's Short Pattern	25oz	Hickory	5	SJ-SSH28	Scutch Single End	20oz	Hickory	5	SJ-MCH40	Club	2 <sup>1</sup> / <sub>2</sub> lb	Hickory	4
SJ-BSF25	Bricklayer's Hammer	24oz	Fibreglass	5	SJ-SDH22	Scutch Double Ended	22oz	Hickory	5	SJ-MCH64	Club	4lb	Hickory	4
					SJ-CC1	1" Scutch Comb	-	-	100	SJ-MCH40FG	Club	2 <sup>1</sup> / <sub>2</sub> lb	Fibreglass	4
										SJ-MCH64FG	Club	4lb	Fibreglass	4
										SJ-AVCLUB40	Anti Vibration Club	2 <sup>1</sup> / <sub>2</sub> lb	Anti-Vibration	4
										SJ-AVCLUB64	Anti Vibration Club	4lb	Anti-Vibration	4

Used by bricklayer's for cutting and fitting bricks and stonework.

- Square end for tapping bricks into place. Chisel end for cutting bricks
- Choice of hickory or fibreglass shaft
- Polished head
- Fibreglass shafts provide oil, chemical and water resistance 10 times stronger than timber and 8 times stronger than steel

Similar in shape to a brick hammer but with a single or double ended grooved end for taking scutch combs or chisel bits. Replaceable bits used for cutting stone, brickwork, or for removing mortar prior to repointing.

- Single ended with one striking face and one grooved end
- Double ended with both ends grooved
- Hickory handle

Used in the building and construction industry for delivering short heavy blows, eg. with cold chisels and brick bolsters.

- Polished striking face
- Hickory, Fibreglass or anti vibration handles

22-639R	Brick Cutting	230mm (9")	75mm (3")	19mm (3/4")	5						

All of our cold chisels are manufactured to British Standard specifications using the latest production methods and equipment. To resist 'mushrooming' every chisel shank head is specially shaped and cutting edges are hardened for durability.

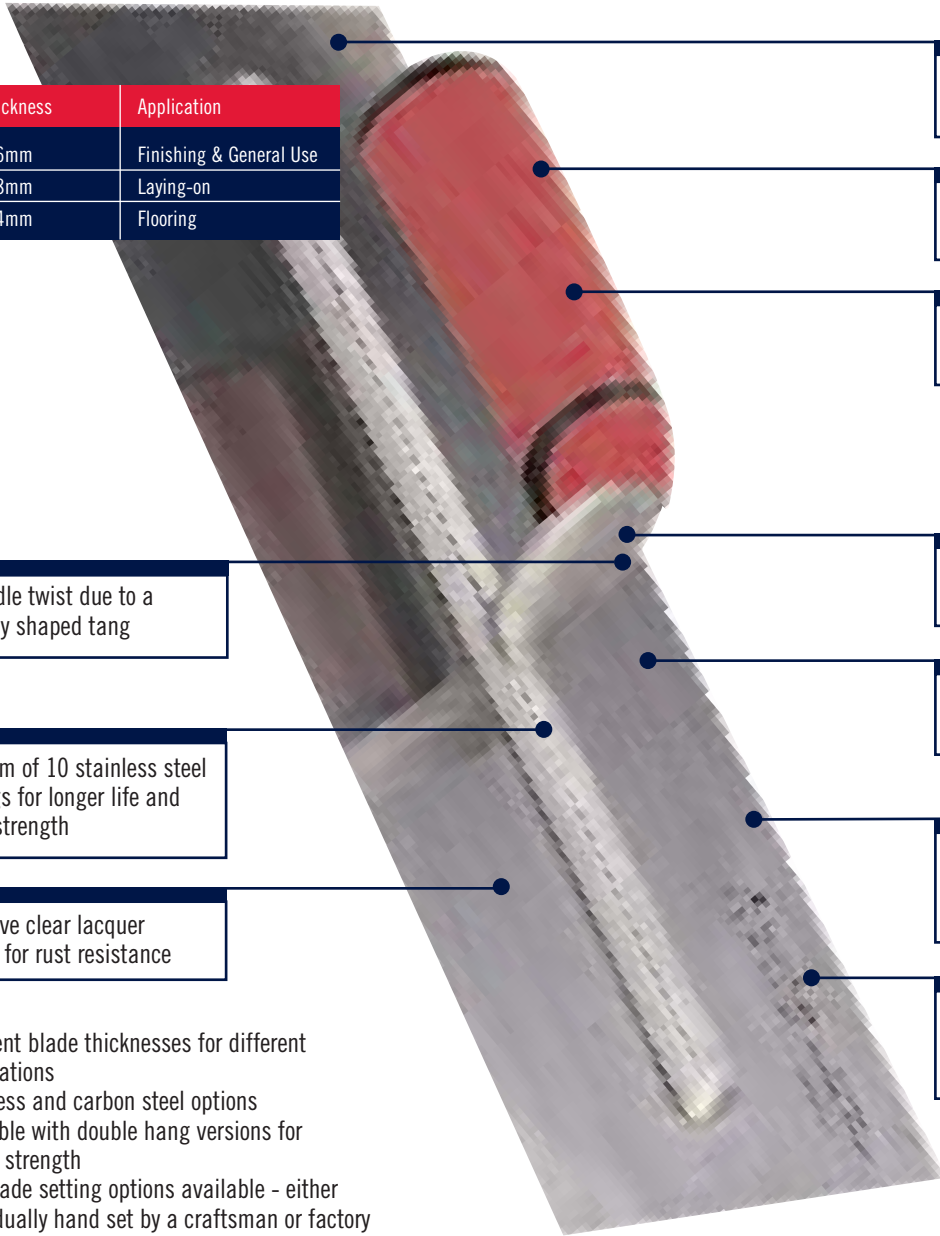

## PLASTERING TOOLS

### A HISTORY OF QUALITY IN PLASTERING TOOLS

Ever since Joseph Tyzack introduced steel blades to replace traditional wooden trowels in the late 19th century, the **WHS TYZACK** name has set the standard for quality plastering tools. Another innovation, for example, was a patented design enabling the blade to be attached to the tang without the need for the rivets to go right through the blade, thus solving the problem of 'drag lines' when finishing. Additional features such as hardened and spring tempered blades also ensure that **WHS TYZACK** tools are strong, durable and give outstanding performance. Available in both carbon and stainless steel with a variety of blade sizes and ergonomic handle options, **WHS TYZACK** is the ultimate in comfort and performance.

Blade thickness	Application
0.24"/0.6mm	Finishing & General Use
0.32"/0.8mm	Laying-on
0.56"/1.4mm	Flooring

Cross ground blade for easy material flow and reduced drag

Ergonomic handle options for individual user preference

Improved handle design for maximum user comfort

No handle twist due to a specially shaped tang

Lightweight, strong, die cast aluminium tang

Minimum of 10 stainless steel weldings for longer life and added strength

Every blade 'dished' to prevent corners digging into plaster

Protective clear lacquer coating for rust resistance

Roll tensioned blade ensures consistent blade shape and even application

Hardened and spring tempered steel for right balance between rigidity and flexibility

- Different blade thicknesses for different applications
- Stainless and carbon steel options
- Available with double hang versions for added strength
- Two blade setting options available - either individually hand set by a craftsman or factory set to provide extra value for money

## Handle Options

BEECH, BANANA

The only quality trowel to have specially treated and shaped handle for smooth comfortable grip and minimal distortion when wet.

MAHOGANY, BANANA

The only quality trowel to have specially treated and shaped handle for smooth comfortable grip and minimal distortion when wet.

STRAIGHT

The only quality trowel to have specially treated and shaped handle for smooth comfortable grip and minimal distortion when wet.

SUREGRIP® SOFT-FEEL

Soft feel grip with ergonomic design for maximum comfort.
