

A New Generation of Extended Life Straight Router Cutters

CNC MACHINING

- A brand new generation of high wear carbide developed exclusively with the world's leading carbide manufacturer.
- More precise automated grinding processes that further improves the carbide's resistance to wear.
- Up to 200% the life-time even when working with abrasive materials.
- The most cost effective carbide available today.

HAVE YOU GOT THE **DYNAMIC** EDGE?

Competitor

Trend's automated grinding technology gives an unparalleled finish to new cutters. This higher quality finish provides a product that cuts at least twice further than it's nearest competitor.
