

Trend's snazzy Snappy System

Anthony Bailey takes a look at Trend's long established quick change system

1. Tote carry case

A purpose designed tool bag for drilling & screwdriving tools and ideal for cordless drills. Tough hardwearing polyester material with rigid metal frame handle and six pockets for boxes of screws. It holds two cordless drills with charger and spare battery.

■ SNAP/TOTE/1

2. Tool Belt

Made from heavy duty polyester, it has pouches that can be removed from the belt: 46in long and adjustable with a quick-release buckle. It will take a hammer and various bit sets, and it even has a mobile phone pouch!

■ SNAP/TB1/SET

3. 22-Piece Snappy Door Hanging set

Fitted with elastic pockets to hold Snappy shanks and supplied with a Snappy pencil. It contains a Quick Chuck and the flatbits required for fitting locks and handle sets. There is a magnetic bit holder and various screwdriver bits for door work.

■ SNAP/TH4/SET

4. 60-Piece Snappy Impact Driver set

Ideal for use with impact drivers. With elastic pockets to hold Snappy shanks. Supplied with a Snappy pencil. The set contains a variety of masonry, auger, twist drills and screwdriver bits, plus

a drive adaptor and bit holders

■ SNAP/TH3/SET

5. 8-Piece Stub Auger Bit Set

Ideal for drilling between joists. They are made from high-quality carbon steel with a screw thread and single spur. From 8mm through to 32mm in popular sizes, all on a 1/4in hex shank.

■ SNAP/SA1/SET

6. Snappy Offline Driver

It drills and fixes in tight spaces. The outer sleeve rotates allowing secure positioning and the shaft swivels to a 15° angle. It will accept both inset bits and direct drive bits.

■ SNAP/OFLD

7. 300mm 5-Piece Flatbit Set

Perfect for all those difficult to

access situations where standard flatbits simply aren't long enough. Bit sizes range from 16mm up to 32mm in standard sizes.

■ SNAP/FB2/ SET

8. 300mm Flatbit Extension

This extension has a hex socket at the front end and grubscrews and an Allen key to lock the flatbit shank rigid. This brings complete drilling security with no danger of losing the bit in an inaccessible void when site working.
