Trend Loc Blocks

These may look much the same as many other non-slip blocks that lift your work up off the bench, but Trend has gone that little bit further with them. A solid plastic core has a soft, quite dense rubber pad on both faces to provide the grip.

Measuring 67 x 67mm and 25mm thick, each block also has a dovetail profile on all four

of its edges allowing them to interlock with each other to give a larger 173 x 173mm solid base for additional support where individual blocks can sometimes dip slightly on the sponge pads when they are under load from a tool.

Not the cheapest on the market at £16.15 for four, but the interlock profile does give them a little more than the rest, and you can interlock as many as you want if you are looking for a substantial anti-slip support.

Typical price: £16.15
