

# WOOD & WOOD BASED MATERIALS

## Less teeth (RP, GP)

- Preferred for ripping along the grain of hard and softwood and other wood based material.
- Coarser finish.
- Faster feed rate.

## More teeth (CM, TR, FT)

- Preferred for cutting across grain of hard and softwood.
- Finer finish.
- Slower feed rate.

## Suitable for:

- Softwood
- Hardwood
- Particle board
- MDF
- Hardboard
- Plywood

## ALTERNATE TOP BEVEL TOOTH FORM

Teeth have top and front bevel which allows the blade to bite into the timber more easily.

\* Blades have flat tooth form.

## ASSOCIATED PRODUCTS

### TRENDIWAX

Use Trendiwax lubricant when cutting aluminium. Clamp component securely and wear gloves. See page 234.

Product Ref.

**TRENDIWAX**

### TOOL & BIT CLEANER

Use Trend Tool & Bit Cleaner to remove resin and pitch build-up and prolong the life of your sawblades. See page 234.

Product Ref.

**CLEAN/500**

### ANGLEFIX

Use the Anglefix Mitre Guide for easy cutting of angles. See page 214.

Product Ref.

**ANGLEFIX**
