2 functions: Blows or Vacuums & Shreds
Shoulder strap
Cable Length: 10m
Front wheel support
12 Month Warranty
Weight: (NW) 4.5kg (GW) 5.5kg

As a powerful, effective garden power tool, nothing beats the chainsaw. While you must be cautious about using one, nothing beats them for effectively cutting down trees or large branches, or for creating firewood much faster than you could with a hand saw or an axe. All our chainsaws have extensive safety features but, as with all power tools, safety should come first while using a chainsaw, so always follow instructions.

The two key types of chainsaw you could buy are Petrol which tend to be more powerful and are good for cutting down trees and other big jobs, or Electric which are ideal for smaller cutting jobs such as firewood, chopping or lopping branches.

Two Golden Rules - Never take any risks & always wear the appropriate safety gear.

### 40cm (16'') Electric Chainsaw THECS40

Perfect if you have a few logs to cut up or you need to keep various parts of your garden under control, it will even fell a small tree with little hassle.
